Subject: **CulturOlympics**

Dear Mr Fikri,

Recently we met each other and you informed us about the activities of MMEC regarding the exciting plans for creating the CulturOlympics, Culturepoint European Foundation and MMEC Awards.

We are impressed about your plans and the vision of you about the cultural movement you like to set up in Europe and the Mediterranean countries. The CulturOlympics could really create a platform for mutual understanding in Europe.

We discussed the role of Ernst & Young by creating the CulturOlympics organisation and the way we can look after your interests and realisation of your ideas.

As a leading professional organisation in the field of audit and tax in Europe and all over the world we will be able to support you. We have several branch specialists in the field of entertainment and media who are situated all over Europe.

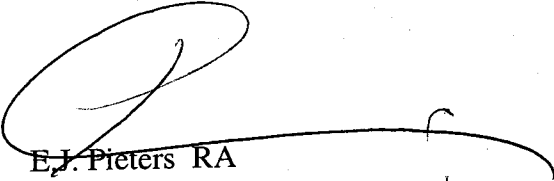

You have requested us to be your partner for several issues which will occur in the next few months. We discussed topics like:

- Creating a governance and legal structure in which the interest of the different participants are embedded;
- Creating a structure of reporting in which transparency for the different kind of participants is guaranteed;
- Issuing an assurance report regarding the prospects regarding the financial aspects of the start up events;
- Giving assurance about the financial reporting regarding bookkeeping of the (start up) events, accounting of the grants and incentives of the participants, etcetera.

As soon as the projects will become in the next stage, we will setup a detailed engagement letter per project.

We are looking forward to cooperate with you with respect to creating a European platform for mutual understanding.

Yours sincerely,
for Ernst & Young Accountants

E.J. Pieters RA
